A live demo

What is ChatGPT?

- Conversational AI

- Natural language

- Machine learning

A brief history

- The concept of artificial intelligence has always been known.

A brief history

- The concept of artificial intelligence has always been known.

- The term "artificial intelligence" was coined in 1955.

A brief history

- The concept of artificial intelligence has always been known.

- The term "artificial intelligence" was coined in 1955.

- The first AI program was called the Logic Theorist.

A brief history

- The concept of artificial intelligence has always been known.

- The term "artificial intelligence" was coined in 1955.

- The first AI program was called the Logic Theorist.

- The fist AI chat bot (A.L.I.C.E.) was created by MIT.

A brief history

- The concept of artificial intelligence has always been known.

- The term "artificial intelligence" was coined in 1955.

- The first AI program was called the Logic Theorist.

- The fist AI chat bot (A.L.I.C.E.) was created by MIT.

- IBM followed that with WATSON.
