

## What is CleanMyMac X?

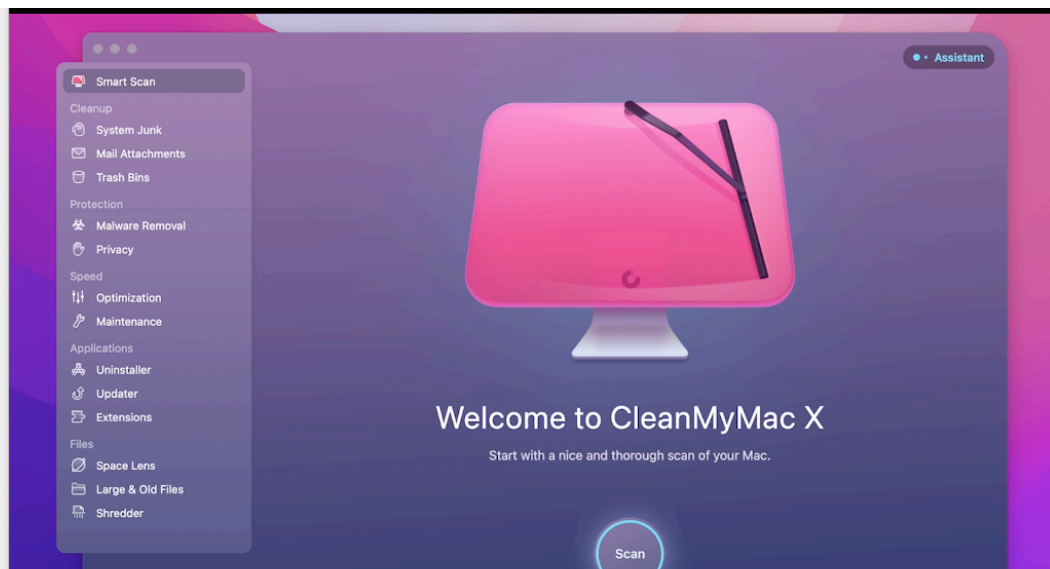

CleanMyMac X is a multi utility application that keeps your computer running smoothly.

Some computer users will argue that one can do all these tasks that I am about to show you, manually with existing software built into your OS. And that is very true. If one knows what they are doing, and are a bit of an expert on the computer.

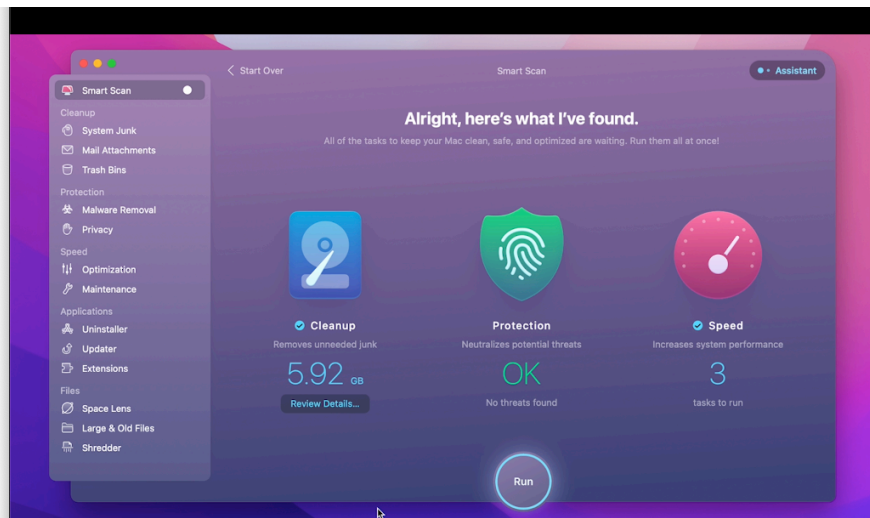

For the rest of us, we have CleanMyMac X utility. The app is on the App Store, but, I would recommend you download it from the Mac Paw website.

Prices vary: One single subscription is \$35, two Macs - \$60, and five Macs - \$80. That is an *annual subscription*.

The version for Ventura is 4.13.0.

This initial scan will go through all your files and apps and the new screen will look like this:”

Once you have done a Smart Scan, start going down the list on the side bar.

CMM tells you what is being scanned. And explains each item to you.

There is an online manual that explains the purpose and operation of each module.
