

Tips and tricks for Mac OS - PMUG meeting

October 14, 2023

By Jim Romaine

1. Edit/undo to quickly undo an action or some typing. Works in almost any program.
2. Use reader view in Safari on Mac. Makes it easier to read an article while eliminating ads, popups, etc.
3. Add or change wallpaper on your desktop.
4. Use launchpad to open an app not in the dock
5. Use Mission Control to view apps that are running in current window
6. Resize your dock
7. Create the degree ° symbol. Hold the Shift-Option-8 keys. If you forget that key combination, type Fn E key to bring up list of symbols.
8. Check the percentage of battery on Bluetooth devices
